

LIVESTOCK TREATMENT RECORD BOOK

Drug Residue Prevention Program

FARM _____

YEAR(S) _____

LIVESTOCK TREATMENT RECORD BOOK

As a livestock producer, you are responsible to ensure that milk and/or meat products from your farm are free of drug residues when they enter the food supply. This record book is designed to help you track the information you need to meet this goal.

How should you use this booklet?

The most important part of any recordkeeping tool is to use it! This book has been designed to help you track the information most producers need to know when milk and/or meat can be marketed; however, you may find it necessary to customize this information to your own needs based on the specifics of your operation. This booklet is meant to be a hand-written system for keeping records. Contact MDA if you want electronic copies of the same records to use with your computer system.

How long should you keep these records?

Remember, treatment records are considered ‘veterinary records’. Many treatments used on farms are done under a prescription or extra-label drug use and must adhere to the standards used for veterinary records. In Minnesota, these records need to be kept for at least 3 years.

Consider creating a new record book at the beginning of each year to easily track records you have on hand!

What is in this Record Book?

The following recordkeeping logs and tools are available for your use in this book; instructions are on the first page of each section:

1. Drug Inventory
2. Animal Health Treatment Protocols
3. Daily Treatment Record
4. Marketing Log

We encourage you to work with your veterinarian to create animal health treatment protocols and to determine appropriate withdrawal times for the drugs you use on your livestock.

PLEASE NOTE! Recordkeeping requirements are subject to change. Our goal is to update our documents annually, but it is your responsibility to make sure you know the most current recommendations. Please feel free to reach out to us or contact your veterinarian if you are unsure as to what those requirements are.

SECTION 1

DRUG INVENTORY

HOW TO USE THE DRUG INVENTORY:

This document is intended to be completed with your veterinarian and reviewed at least once a year. The goal is to identify and review the drugs that are allowed on the farm. This helps assure prohibited and expired drugs are disposed of.

Column Name	Document the following information:
Drug (Trade Name)	The name given to the drug by the company (Ex. Naxcel)
Drug (Generic Name)	The name of the active ingredient or antibiotic (Ex. Ceftiofur)
Concentration	The amount of drug present in fluid, paste, or bolus that is used to deliver it (Ex. mg/mL or mg/syringe)
Meat Withdrawal	Record the withdrawal period for meat (number of hours or days)
Milk Withdrawal	Record the withdrawal period for milk (number of hours or days)

SECTION 2

ANIMAL HEALTH TREATMENT PROTOCOLS

HOW TO USE THE ANIMAL HEALTH TREATMENT PROTOCOLS:

This document is intended to be completed with your veterinarian. The goal is to identify the most common diseases/conditions on your farm and develop a treatment plan for each. This helps assure continuity in drug chosen, and amount administered to decrease the chance that a residue will occur.

Column Name	Document the following information:
Protocol Number	You may choose to assign a number to the treatment plan for each disease/condition that commonly occurs on your farm
Disease or Condition	This is a list of diseases or conditions that are commonly seen on your farm and are often treated by farm employees without the need for a veterinarian (example mastitis)
Antibiotic/Drug Used	The name of the drug or antibiotic the vet recommends for treatment
Dose and Route	Record the amount of drug given (ml, tube, etc) and the route by which it was administered (intramammary, intramuscular, etc)
Frequency of Administration and Length of Time	Record how often the drug is to be administered (once a day, twice a day, every other day, etc) and the number of days the animal is to be treated (1 day, 2 days, etc)
Meat Withdrawal	Record the withdrawal period for meat (number of hours or days)
Milk Withdrawal	Record the withdrawal period for milk (number of hours or days)

ANIMAL HEALTH TREATMENT PROTOCOLS

To be filled out with your veterinarian

Year _____ Veterinarian _____

***INACCURATE ESTIMATION OF ANIMAL WEIGHT CAN RESULT IN A DRUG RESIDUE. APPROPRIATE RESOURCES SHOULD BE AVAILABLE TO HELP MEASURE WEIGHT (WEIGHT TAPE, SCALE, ETC.)**

****We recommend you contact your veterinarian to determine if a withdrawal period should be extended, especially in the following situations:**

1. Multiple drugs were administered to the animal
2. A drug was used in an extra-label manner without the knowledge of your veterinarian
3. An animal is visibly ill/poor-doing at the end of the withdrawal period.

Protocol Number	Disease or Condition	Treatment Protocol: Antibiotic/Drug Used	Treatment Protocol: Dose* and Route	Frequency of Administration and Length of Time	**Meat Withdrawal	**Milk Withdrawal
1	Pneumonia	Naxcel	20 cc IM	Once daily for 3 days	4 days	0 hours

SECTION 3

RECORD OF TREATMENTS

HOW TO USE THE DAILY TREATMENT RECORD:

This document is to be used to keep track of individual animal treatments in a herd. Record **each** time an animal is treated with a drug. Complete the information requested in each column for each treatment.

Column Name	Document the following information:
Animal ID	The ID of the animal using a tag or barn number
Diagnosis	The disease or clinical signs that are being treated
Treatment date	The date treatment was administered
Drug	The name of the drug that was administered
Dose	The amount of the drug administered. This dose may change for subsequent administrations. Be sure to record changes in dose.
Route	The route in which the drug was administered (IM, IMM, SQ, Base of ear, etc)
Frequency of treatment	How often the drug is to be administered (once, twice a day, etc)
Treatment performed by	The name or initials of the person who administered the treatment
Date withdrawal expires: Milk*	The last day of the withdrawal period (this should be calculated from the last treatment day for a given 'event' or group of treatments)
Date withdrawal expires: Meat*	The last day of the withdrawal period (this should be calculated from the last treatment day for a given 'event' or group of treatments)
Final treatment for condition	Check this box if this is the final treatment of the series the animal received to treat a specific condition. This should prompt the reviewer to calculate a withdrawal time from this treatment.
Animal received multiple treatments	Check this box if an animal received multiple treatments of the same drug or multiple different drugs. This should prompt the reviewer to look back through the records to ensure an animal has met ALL withdrawal periods.

SECTION 4
MARKETING LOG

HOW TO USE THE MARKETING LOG:

The goal of this document is to prompt producers to review the treatment records and health history for animals that are going to market. This helps assure healthy unadulterated animals enter into the food chain.

Column Name	Document the following information:
Date	Record the date the animal is sent to market
Animal ID	Record the animal's identification
Treated within past 90 days?	Check YES if the animal was treated within the past 90 days and NO if it was not
Last drug used	Record the last drug that was administered to the animal
Any S.T.O.P. criteria present?	<p>S: Standing or walking is not possible</p> <p>T: Treatments were recent and may require an extended withdrawal period</p> <p>O: Obvious condition/disease that would lead to condemnation of the carcass</p> <p>P: Poor prognosis or poor body condition score (two or less) for recently treated animals</p>
Date latest withdrawal period expired	Refer to treatment records to make sure the animal has cleared ALL withdrawal periods and record the most recent withdrawal period expiration date
O.K. To Sell?	<p>The animal is O.K. to sell if:</p> <ol style="list-style-type: none"> 1. It has cleared the withdrawal period 2. Appears to be in good health 3. Does NOT exhibit any of the S.T.O.P. criteria listed above*

*If your animal meets any of the S.T.O.P. criteria listed above, consider getting additional veterinary input to determine whether the animal is fit for slaughter or if the withdrawal period should be extended.

Marketing Log
