**FORM** 

## **Anhydrous Ammonia**

FIRM:

## Pressure Relief Valve (PRV) Installation/Replacement Record

CITY:

Pressure relief valves installed in an anhydrous ammonia tank must be 250 PSI/NH3 rated.  MN RULE, PART 1513.0180, Subpart 14. Replacement of pressure relief valves (PRV). No non-refrigerated container pressure relief valve may be used over five (5) years after the date of installation of the pressure relief device. Records must be maintained which identify each container and indicate the date of installation for each container pressure relief device.
