

BEST MANAGEMENT PRACTICES FOR ACETOCHLOR

**Protect water quality by following
Minnesota Department of Agriculture voluntary
BMPs (Best Management Practices) for acetochlor products:**

General water quality BMPs:

Use proper rate
for soil and organic
matter

Consider reduced
rates where
appropriate and
as indicated on
product label

Surface water BMPs:

Install filter strips

Adopt conservation
tillage

Incorporate herbicide
(if tillage is used)

Groundwater BMPs:

Determine depth to
groundwater

Manage irrigation
(where applicable)

Voluntary BMPs for acetochlor and other corn herbicides were developed in 2004.
